Date: 1997 – 2009, 12 years duration

Site: James Hardie

Location: Penrose, Auckland

Product: Anchor Safeguard Panel & Gate System

Application: Perimeter Fencing

James Hardie
a smarter way™

Detail;

James Hardie is a world leader in fibre cement building products. Its major New Zealand production centre is in Penrose, Auckland covering 127,000 sqm. The site contains offices, warehousing, a production facility and car-parking .

After redevelopment of the site in the 90's James Hardie required a perimeter fencing solution that was durable, and inconspicuous. Gate security necessitated a range of options from pedestrian to heavy vehicle access. Wanting to ensure site security and staff safety Anchor Safeguard panels were selected as the "best fit".

These met the following criteria;

- Providing security along an extensive road frontage.
- Fencing & Gates manufactured and Galvanised/Powder Coated to Aus/NZ Standards.
- Powder Coated with Dulux material in corporate colours.
- A reliable New Zealand made solution.

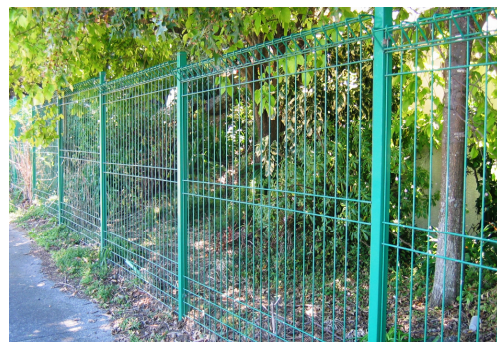

12 years later the Anchor Safeguard Panels and Gates system is in place and still in good condition.

Below is the original photo in 1997 after installation, and a more recent photo taken in March 2009.

1997

2009

Anchor is New Zealand's No1 Fence Manufacturer – est 1972.
