**Customer:** Fletcher Construction  
**Site:** Westpac Stadium “The Cake Tin”  
**Location:** Wellington  
**Product:** Anchor Welded Wire Reinforcing  
**Application:** Construction

## Detail;

Westpac Stadium is one of New Zealand's premier sporting venues with a capacity of 40,000. It was completed in 2000 to provide a world class sporting and entertainment facility in the nation's capital.

Since completion the site has hosted numerous international sporting occasions including the All Blacks (rugby union), the Black Caps (cricket), the Kiwis (rugby league), and is home to the Lions (rugby) & Phoenix (football). In 2000 the Edinburgh Military Tattoo was hosted in this stadium for the first time outside of Scotland.

Anchor provided Welded Wire Reinforcing (WWR) which was incorporated into precast concrete and transported to site for construction of the \$130 million structure. Our New Zealand made WWR has been utilised in many nationally recognised projects including;

- New Zealand Army Museum, Waiouru
- Marsden Point Oil Refinery, Northland
- Huntly Power Station, Waikato
- Eden Park Stadium Auckland
- Taupo Motor Racing Circuit, Bay of Plenty

Anchor has also exported WWR to North America, French Polynesia and the South Pacific. For nearly 40 years Anchor has supplied our New Zealand manufactured product to the construction sector.

**Anchor is a leading Manufacturer of WWR – est 1972.**
